

ISSUE	Short Term Action	Mid Term Action	Long Term Action	2020 UPDATE
<p>Traffic and road safety are the major areas for concern, especially traffic speeding through the village creating a hazard. The problem areas are:</p> <ol style="list-style-type: none"> <li>1. The Surgery/Hambleton View .</li> <li>2. Around the Green/Shop.</li> <li>3. Alne Road from the Green to the end of the village.</li> </ol>	<p>PC to approach Highways to suggest a joint initiative to review traffic problems caused by speed &amp; volume, with evidence gleaned from community plan.</p>	<p>Consider changing the roads around the village green to a one way system. Review speed and volume of traffic problems in 2012</p>	<p>Reduce concerns over speed and volume of traffic as detailed in a review of parishioners</p>	
	<p>Highways do not have any influence over concerns of speeding and volume of traffic. The PC has engaged with North Yorkshire Community Safety Partnership and North Yorkshire Police on numerous occasions since the publication of this plan. Both covert and Overt traffic speed and volume survey have been carried out on the village roads. The results of these surveys do not support the perception that there a large volume of vehicles speeding on the village roads. A number of temporary short term proactive measures have been put in place throughout the life of the plan, such as high visibility police speed checks, camera safety partnership speed checks, temporary matrix signs.</p>	<p>Highways have previously been approached and asked to consider the viability of changing the roads around the Village Green to a one way system; however, it is considered that there is insufficient vehicular traffic to support this.</p>	<p>See Short Term actions - The PC continuously monitor this area and request traffic surveys at least annually.</p>	<p>Continued concerns over speeding and levels of heavy traffic transiting through the village. The following actions are currently being pursued by the PC:</p> <ol style="list-style-type: none"> <li>1. Changing the road priority at the junction of Warehills Lane and Newton Road to enhance the safety of the junction and reduce the number of road traffic collisions at the location.</li> <li>2. Purchase and install a vehicle speed sign that can be sited at fixed locations at approaches to the village. Highways engineer recently visited the village to advise on both of the above. The outcome of this visit is: The PC have agreed to purchase two VAS signs. One will be purchased and installed imminently and the second purchased later in 2020 when the PC receive the second installment of the precept. To change the priority of the junction at Warehills Lane would cost a significant amount of money, much more than the PC have access to. The Highways engineer also articulated that as this junction has very few injury collisions recorded, it is low priority. Therefore, at this time it is not envisaged that any major changes will take place at this location; however, the PC will continue to lobby to have changes made to make this junction safer. The PC is also exploring the possibility of making the road a one way system around the village green.</li> </ol>
<p><b>Road and Verge Maintenance</b> - 1. The length of time taken to undertake repairs is unacceptable. 2. Approaches to the village should be improved to give a better village appearance. 3. Problems occur in conditions of snow and ice.</p>	<ol style="list-style-type: none"> <li>1. PC to put pressure on HDC for timely review of problems.</li> <li>2. Production of a quarterly report on state of the roads and verges in the village to go be forwarded to HDC.</li> <li>3. Check NYCC Highways schedule to determine which areas are managed</li> </ol>	<p>Address current road defects and maintain to an acceptable standard.</p>	<p>Enhance appearance and feel of the approaches to the village and the appearance of roads and verges within the village.</p>	

<p>1. What is an acceptable length of time? Any repairs that are responsibility of NYCC or HDC are subject to financial and availability constraints which the PC has no influence over. Any repairs that the PC would be responsible for are also subject to financial restraints and priorities. The same rationale is applicable to improving the approaches to the village. The PC have invested in several grit bins around the village and a grit spreader.</p>	<p>Local Cub Scout group produced a plan of all road defects in the village, forwarded to HDC.</p>	<p>PC reports all reported road defects to HDC/NYCC at the earliest opportunity and follows up to ensure any repairs are carried out.</p>	<p>Grass cutting of verges on the approach to the village are responsibility of NYCC. Enquiries made to replace Village name signs at entrances to village; however, was cost prohibitive and would require permission from Highways following Risk Assessment. Ongoing</p>	<p>New Village sign has been ordered to be installed at the Sykes Lane entrance to the village. The PC have funded a ladies group to locate and plant tubs of flowers and seasonal plants at the approaches to the village and around selected locations within the village. The PC continue to fund grass cutting around the village from annual precept. The PC continue to lobby HDC to facilitate regular upkeep of the road verges outside the PC control or responsibility; however, HDC funding for this is limited.</p>
<p>3 <b>Parking at the Surgery</b> - Parking at the Surgery is a problem. It is particularly difficult for persons with a disability to gain easy access to the surgery.</p>	<p>PC to consider putting up a road sign outside the surgery re-directing all vehicles to park at the church.</p>	<p>On going review of parking. Reduction in traffic in the vicinity of the surgery - increased visible signage with directions to the church carpark and leaving designated space for disabled</p>	<p>Minimise disruption for residents in Hambleton View and make it easy for anyone arriving at the surgery to park. Ensure any development of a new surgery made provisions for parking and access for disabled as a priority.</p>	
<p>PC agree that this is the case.</p>	<p>PC shared the contents of the Parish Plan and liaised with the partners at the surgery. Any signage would need to be paid for from NHS funds and would have to be approved by Highways. Neither party were prepared to move this forward.</p>	<p>See Short Term Actions</p>	<p>See Short Term actions. During initial presentations by the developer and surgery partners, the PC did highlight the need for sufficient parking provision; however, this is dictated by a parking formula for new build public buildings</p>	<p>This issue will cease to exist in the near future with the relocation of the Dr Surgery to its new location on the new development at the rear of Forge Lane</p>
<p>4 <b>Pedestrian Footpaths</b> - The lack of a footpath from the A19 down Station Road is a concern as is the footpath (or lack of it) over the Station Road Bridge, particularly with caravan site becoming more popular</p>	<p>PC to investigate options for improving the safety of pedestrians and vehicles on Station Road Bridge</p>	<p>Maintenance of general footpaths in good order</p>	<p>Ensure safe use of footpaths for all visitors &amp; residents in all seasons</p>	
<p>It is unlikely that it would be ever agreed to install a footpath for the whole length of Station Road from the A19. This would be extremely expensive and not seen as a priority.</p>	<p>With the installation of the new bridge on Station Road, due to open in June 17, this will have a footpath and a one way traffic light controlled system in place.</p>	<p>Any faults or damage to any footpaths around the village are reported to the appropriate agency at the earliest opportunity.</p>	<p>See Mid Term actions. Grit bins and grit spreader in place around the village in case of inclement weather conditions.</p>	<p>New bridge in place across the railway line at Station road which incorporates a footpath across its complete length. This has significantly enhanced pedestrian safety at the location. The PC continue to report faults and damage to foot paths at the earliest opportunity and the P continue to monitor the grit bins within the village and ensure that they are filled.</p>
<p>5 <b>Bus Services</b> - The majority of people who use the bus are quite dissatisfied with the bus service to the village. Users want an increased frequency of service, or a service later in the evening out of York that would allow them to return from theatre, cinema or bingo</p>	<p>PC to engage with NYCC over the frequency and timings of the service in the evenings. Older Parishioners (Many of whom didn't complete the questionnaire) to be approached for their views.</p>	<p>Consideration of specific transport for elderly and disabled parishioners for shopping hospital etc.</p>	<p>Possibility of encouraging car sharing to reduce traffic flow and effects on the environment. - PC to do all it can to provide a bus service that meets the demand from within the community.</p>	

	<p>PC discussed this with NYCC local member. Bus services are provided by commercial companies who will only provide a service that is financially viable. NYCC do provide some funding to these companies; however, it is a case of supply and demand. There would be little or no point canvassing views of those that did not respond, PC expect that opinions would support the view that the service is inadequate.</p>	<p>This could be considered</p>	<p>See short term actions</p>	<p>The PC recognise that the number of commercial bus service companies continue to decline due to the financial viability; however, the bus services to and from the village have remained unchanged over the last two/three years with assistance of NYCC subsidies. Councillors are leasing with other Parish Councils, Town Councils, HDC and NYCC through local forums to explore options for provision of transport particularly for the elderly and less mobile members of the community. The PC will continue to monitor the level of provision of local bus services to ensure that there is no further reduction in service.</p>	
6	<p><b>Housing</b> - There is overwhelming rejection of further building in the village</p>	<p>PC to consider the consensus view that there should not be more housing development in the village</p>	<p>Review in 2012</p>	<p>Ensure the PC considers the views of the Parish</p>	
	<p>The PC have been consistently opposed planning applications for further new builds within the village in accordance with the majority view of the village.</p>	<p>See Short term actions</p>	<p>The PC has carried out further canvassing of parishioners views on at least two occasions. The PC has made HDC and NYCC aware of the views of the village both in writing and in persons at individual planning meetings. The PC have also made the villages views known in respect of further building in respect of long term house building planning.</p>	<p>Despite robust and regular opposition to new build housing within the village, The planning committees of HDC and NYCC continue to approve planning for new build developments within the village. Councilors' have attended these meetings to articulate our objections; however, this has not had any impact whatsoever. The PC will continue to robustly articulate the views of the village and raise pertinent and objective concerns around the scale of new builds being approved within the village, particularly within the conservation area of the village.</p>	
7	<p><b>Refuse Collection</b> - You would like to see ongoing reviews of refuse collection. The recycling facilities in the pub car park should be emptied more often and generally increased.</p>	<p>PC to discuss the level of service offered by HDC over Christmas period</p>	<p>Review recycling availability, collections and possibility of increasing items collected</p>	<p>Do all we can to maintain the current level of service and request holiday periods in particular are covered properly</p>	
	<p>The PC are unable to influence the frequency of refuse collections which are subject to availability of central and county government funding.</p>	<p>Not something the PC can influence</p>	<p>Recycling shed was subject to access to private land - permission for access was withdrawn</p>	<p>We have the same cover as everyone else across HDC</p>	<p>There is no change to any earlier updates. This is an area that the PC has little or no influence over. The services are delivered by HDC within the constraints of their budget.</p>
8	<p><b>Policing Cover</b> - Despite no increase in crime you felt there was a lack of police presence in the village</p>	<p>PC to liaise with the Police about concerns over inadequate policing</p>		<p>Work towards the majority of people in the village perceiving the level of policing has been improved.</p>	

The PC regularly liaise with local area officers and PCSOs to ensure that any emerging crime issues are identified.

Difficult to measure as the demographics of the population within the village will have differing views on what a good level of policing presence is, ranging from the a "Village Bobby" to where it sits within a structured prioritisation according to crime data.

Actions 8 and 9 are linked. The PC continue to liaise regularly with the Neighbourhood Police Team at Easingwold. Councilor Jackson has also set up a neighbourhood App, "Nextdoor" which he regularly updates with local information from the police. Many residents of the parish have registered as members. Councillor Jackson also manages the village website and Facebook site, which he also updates with information from the police on a regular basis. We are liaising with the local NPT with view to have them visit a public meeting to discuss setting up a NWS and the appetite of parishioners to manage such a scheme. The village continues to enjoy an extremely low crime rate and the police presence within the village reflects that.

<p>9 <b>Neighbourhood watch Scheme</b> - There is a need for an NWS and many of you would participate but no-one wants to take responsibility for organising it.</p>	<p>PC to invite the Police to address a meeting of those who expressed an interest in joining a NWS</p>	<p>Encourage a local parishioner to lead</p>	<p>Establish a scheme when the community wants and is able to sustain one</p>	
<p>There is a local one in Church Close but nowhere else in the village.</p>	<p>We did - only 1 or 2 turned up</p>	<p>No-one willing</p>	<p>No one willing</p>	<p>As above</p>
<p>10 <b>Healthcare</b> - There is full and ongoing support for a village surgery to meet local needs, with associated pharmacy</p>	<p>Questionnaire results to be shared with the surgery</p>		<p>Support retention of a surgery</p>	
<p>The PC fully supports the retention of a surgery within the village</p>	<p>Completed</p>		<p>Agreed</p>	<p>The new Daniel Gath development will include a new Medical Centre for the Tollerton Surgery. It will include up to date facilities and include off street parking. This is due to open before the end of 2020.</p>
<p>11 <b>Awareness of events, facilities and activities in the village</b> - There is a general lack of awareness of the range of facilities and activities available. Young people would like to see an additional notice board of events and activities.</p>	<p>Consider siting of additional notice board</p>	<p>Consider production of a leaflet etc. for persons new to the village Increase knowledge and usage of Tollerton Internet site</p>	<p>To improve communications within the village</p>	
	<p>A new Notice board has been sited at the village green - one is now for PC and the other for community use. It is very well used</p>	<p>Who would produce and distribute the leaflet. How do we know when someone new moves into the village? The Internet site has been upgraded and improved and also supplemented with a Facebook page.</p>	<p>See medium term actions</p>	<p>Councilor Jackson continues to manage the village website, Facebook page and has recently added a neighbour hood application, "Tollerton Nextdoor." Many parishioners use all of these digital platforms for information. The PC are cognisant of the fact that not all have access to these digital platforms, therefore the PC continue to place important information on the notice board at the village green and regularly have entries in the Parish Newsletter. We are also aware that the recently formed, Tollerton Action Group (TAG) regularly advertise information of events and activities within the village. We welcome any assistance in ensuring that parishioners are aware of all such events.</p>

12	<p><b>Sport and Leisure</b> - There is support for existing facilities but you would like to see an increased range of activities for teenagers</p>	<p>The results of the questionnaire to be shared with S&amp;R committee with particular reference to football, cricket nets, facilities for older children, under cover facilities</p>	<p>Review the possibility of making the village "Healthier" - more visibility of local walks, encourage a walking club, increased visibility of a running club</p>	<p>To secure the future, maintain the current level of activities and develop more activities for teenagers and families.</p>	
		<p>Shared - Little or no interest in football or cricket. New facilities by S&amp;R - Basketball nets and cycle track</p>	<p>All local walks are listed on the village internet site - Walking and running clubs seem a little specific! There are both very local in Easingwold.</p>	<p>See short term actions - Also creation of village family orchard and picnic area - refurbishment of allotments</p>	<p>The PC continue to provide significant financial support to the Sports and Recreation Committee and the village Hall committee to develop and maintain their facilities. The PC will continue to support village events, clubs and organisations where possible, within budgetary constraints. A formal application and approval process for funding requests has recently been drafted and approved by the PC. The same issues of lack of volunteers is unchanged, therefore events such as the village show continue to be non-events.</p>
13	<p><b>Events</b> - You are very supportive of the current events, which should be maintained, but there is general reluctance to actively get involved with arranging events</p>	<p>PC to consider a sustainable plan for the village events i.e. Village show, open gardens/Artfest etc.</p>		<p>To preserve regular events in the village</p>	
		<p>As alluded to there is plenty of vocal support for such events; however, no-one is willing to organise. Village hall committee have organised some events but only the usual few are left to organise these events</p>		<p>See short term actions</p>	<p>See action 12</p>
14	<p><b>The Green</b> - Everyone likes and supports the central feature of the green and many would like to see increased maintenance and litter facilities in this area</p>	<p>To be more visible as village focal point PC to upkeep and maintain the Green development of this area - must not prohibit the fair coming to the village occasionally - consider removable seating and bin.</p>	<p>Remove the bin and sign and add seating</p>	<p>To Maintain and develop the Green</p>	
		<p>Green now has updated seating and a new bench. It has had new posts al the way round the green to prevent damage by vehicles and make it more pleasing on the eye. The fairs has not attended for a number of years and therefore the covenant allowing them to use the green has lapsed.</p>	<p>Done</p>	<p>Always on going</p>	<p>The PC are currently in negotiations with TAG in respect of providing an electricity supply to the village green to enhance that open space. It is envisaged this could be used to have lights on the tree at Christmas, be used to power any other vents held on the green. The PC is open to any suggestions. Since the last update of this plan, the PC have installed wooden post around the green to protect the verges from being damaged by vehicles driving on the grass. A new waste bin has been installed. Maintaining the village green remains a priority for the PC.</p>

15	<p><b>Maintenance of existing village facilities</b> - Facilities very well supported - particularly the village shop, public houses, the green, sports facilities, the village hall and the church hall.</p>	<p>PC Should focus on maintaining facilities like the village hall, green areas etc. and support the shop, post office, surgery and church</p>	
		<p>The PC is an ardent supporter of all of these facilities - we have also made regular and large financial contributions to the Village Hall and S&amp;R to maintain and improve their facilities.</p>	<p>The PC continue to be a supporter of all the aforementioned village amenities and provided significant funding for some of them. The PC will continue to support these amenities in whatever way that it can. Since the last update of this plan, The Blackhorse PH was adopted as a community asset.</p>
16	<p><b>5 Year plan progress review</b> - You are pleased to see a plan being developed and want to see it published, but most importantly want it to happen. You want progress monitored and reported on.</p>	<p>PC to establish an Independent review group. This group is to review progress after 12 months and, in conjunction with the PC, produce an annual review of progress against the plan to be reported at the annual meeting of the PC.</p>	<p>3 yearly review of progress by independent review group to review progress against plan and jointly produce a report to PC and Parish.</p> <p>5 year review of plan and next steps.</p>
		<p>Year one review carried out by parish plan development group</p>	<p>Not carried out - Parish plan development group disbanded and no-one else could be recruited to carry out the review</p> <p>Not carried out - Parish plan development group disbanded and no-one else could be recruited to carry out the review</p>
			<p>The next step for the PC is to develop a neighbourhood action plan. This is the logical next step and would provide many benefits for the parish. These type of plans help to influence planning for the area and deliver a shared vision for the development of the village/parish. To do this the PC will require a number of parishioners to get involved to help draft the plan. It is a large and complex document; however, will be well worth the effort.</p>
