

SAFER HAMBLETON & SAFER RICHMONDSHIRE

Our Ref: PW/TLH

Tuesday 7th October 2014

Cllr Nigel Knapton
Clerk to Tollerton Parish Council
4 Central Buildings
Market Place
Easingwold
YO61 3AB

Dear Cllr Knapton

Speeding Concern: Tollerton, Station Road

For your information please be advised that we have recently received a request from a local resident for the deployment of the speed measuring data logger at the above location. This referral was discussed at the multi-agency meeting of the Safer Hambleton and Safer Richmondshire Speed Matrix Group, held on Wednesday 24th September 2014.

Please be advised that the data logger was recently deployed at this location, and I have enclosed a copy of the results letter which was sent to Tollerton Parish Council for your information. Therefore, on this occasion we regret to inform you that we are not in a position to be able to redeploy the data logger.

If you have any further queries please do not hesitate to contact Tracey Horseman, Community Safety Support Officer on email: tracey.horseman@richmondshire.gcsx.gov.uk or telephone number 01609 767280 / 01748 901047.

Yours Sincerely

A handwritten signature in blue ink, appearing to read "Pat Wilson".

Dear Mr Frost

Speeding Concern – Tollerton, Station Road

Further to our recent correspondence with yourself, I am writing to provide you with an update from our meeting of the Hambleton & Richmondshire Speed Matrix Group held on Wednesday 30th January 2013

At this meeting it was noted that the data logger has now been deployed for a 7 day period commencing 10th December 2012 at a location on Station Road opposite the Village Hall as identified with Cllr Mark Brown and James Titchener, with the following results:

- Towards Tollerton - 85% of the vehicles were travelling at a speed of 33mph or less over the period of deployment, with approximately 5,587 vehicles;
- Away from Tollerton – 85% of the vehicles were travelling at a speed of 29mph or less over the period of deployment, with approximately 7,704 vehicles.

From this process and analysis of the data it has shown that the speeds recorded are commensurate with the expected results within a 30mph speed limit and we have concluded that no further action is required at this present time. We appreciate it is often found that perceived speed is significantly higher than the actual recorded speed and in this instance this is what the data and analysis have identified.

In the meantime if you have any further queries please do not hesitate to contact Tracey Horseman telephone number 01609 767280 or email: tracey.horseman@hambleton.gov.uk

Yours Sincerely

Pat Wilson
